(54) DEVICE AND METHOD FOR PREVENTING PRODUCT REPRODUCTION USING ALP

(57) Abstract:

PURPOSE: A device and a method for preventing the product reproduction using the ALP(Algorithm License Permission) are provided to disable operation if an ALP chipset is not existed in a product manufactured by an external manufacturing company, and to easily check the ALP chipset embedded in the product. CONSTITUTION: The device comprises an external electric/electronic controlling device and the ALP chipset. In the ALP chipset, an external interface device(22) interfacing with the external controlling device and the interface output are wired to a ROM table(21) and an operation device(23). The output of the operation device is connected to the external interface device by a result value output device(24), and is connected to an external CPU.
